ABOUT ME

Frontend Engineer with strong UX foundations, focused on building scalable, high-performance interfaces for complex, data-driven products. Experienced in owning frontend architecture end-to-end – from design structuring to production-ready implementation – with emphasis on component systems, performance, accessibility, and long-term maintainability. Comfortable working in product-focused environments, collaborating closely with engineering and product teams to deliver pixel-perfect, reliable user experiences.

WORK EXPERIENCE

Empresa Brasil de Comunicação - EBC | 2023 - current

Frontend Coordinator / UX Engineer

- Led frontend architecture and UX decisions across major public-sector digital platforms including EBC Portal, Rádio Gov, Agência Brasil and others serving nationwide audiences.
- Designed and implemented scalable frontend systems using JavaScript, React and TypeScript, translating complex editorial and operational workflows into intuitive interfaces.
- Standardized layout patterns and UI consistency across multiple products, improving maintainability through structured component architecture.
- Contributed to migration initiatives toward modern React-based architecture (Plone 6 / Volto) and applied accessibility standards (WCAG) and performance best practices across interfaces.

EDUCATION

Pontificia Universidade Católica de Minas Gerais | 2024-2025

Postgraduate Degree – UX Engineering

Universidade Cruzeiro do Sul | 2020-2023

Bachelor's Degree – Software Engineering

TECHNICAL EXPERTISE

Frontend Architecture

React, TypeScript, JavaScript, HTML5, CSS3, Plone 6 CMS, Next.js

UI Engineering

Component architecture, design systems, scalable UI

Performance & Quality

Accessibility (WCAG), performance optimization, maintainability

Backend Integration

REST APIs, Node.js, service integration, data normalization
